## K-2 Newsletter

### Reading/ELA

In April we will be starting our unit: *Meeting Characters and Learning Lessons: A study of story elements*. In this unit we will be talking about story elements such as; characters, setting, problem, and solution. Students will talk about sequence of events and learn to retell a story in their own words. Students will also learn more about their characters by thinking about how their characters act and about the lessons that the characters have learned.

### Writing

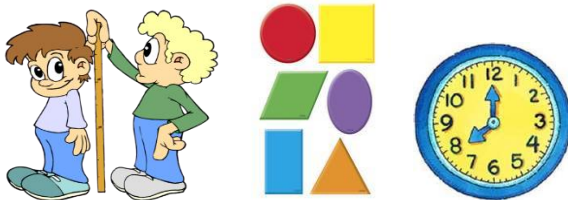

In writing, we will be starting our unit on writing series books. Students will practice using what they learned about series reading and narrative writing in order to write their own realistic fiction stories. Students will create a character and a mini-series about their characters. Students will include story elements such as problem/solution and setting.

### Science

In April, we will continue our unit on Light and Sound. In this unit, students will act as light and sound engineers as they are asked to design, build, and then project a scene for a puppet show. As light engineers, they will have to answer the question; *how do we make different parts of a surface brighter or darker?* Students will be investigating cause-and-effect relationships.

### Social Studies

In April, first graders will continue to learn about families now and long ago. In this unit students will learn about life long ago and make comparisons to how life is today. Second graders will continue to learn about New York City overtime. In this unit students will explore New York City long ago. Kindergarteners will continue to learn about individual development and cultural identity. In this unit students will learn how people are the same and different across America.

## Math

In April, kindergarteners will be learning about how to identify and describe three-dimensional shapes. Students will learn how to identify, name, and describe spheres, cubes, cylinders, and cones. Students will also learn about vocabulary words such as; above, below, beside, and next to.

In April, first graders will be learning about how to represent data. Students will learn how to read and how to make graphs. Students will learn about picture graphs, bar graphs, and tally charts. Students will solve word problems about graphs.

In April, second graders will be learning about length in metric units. Students will learn how to measure with centimeters, how to add and subtract lengths, and how to solve word problems involving measurement. Students will also learn about data. In this unit, students will learn how to read and make graphs. Students will learn about how to collect data, how to make picture graphs, and how to make bar graphs.

## Word Study

We will be doing a variety of activities during word study. We will be practicing our letters and letter sounds to build a strong phonetic (letter-sound) foundation. We will also learn how to spell words by using all that we know about letter sounds. We will continue to practice writing sight words and learn new vocabulary words. We will engage in activities such as writing words in ABC order and writing words in sentences.
