Pre-K Newsletter

Ms. Lee, Mr. Felix

Pre-K 261

Dear Parents,

This month, we will be talking about the "Light" unit. In the light unit, children begin by considering the first week's question, "What kinds of light are around us?" Children will observe, discuss and explore what they know about natural and man-made light. In the second week children will have learning experiences and activities that encourage them to think about darkness. In the third week, children focus on the question, "How does light help us?" They will continue to explore how light affects our world. For example, through conducting an experiment on growing plants in the light and in the dark. In the final week, children explore shadows by using flashlights and other light sources in the classroom as well as experimenting with shadows outside. Through these explorations they are making science content and scientific thinking accessible and meaningful and building on their curiosity about science concepts.

Important Dates
